VITAFOL® has all the right stuff for you and your baby

A family of products with
all the nutrients the two
of you need

Take the right step

Choose VITAFOL® and know that you will be taking the essential nutrients that are so important to the development of a healthy baby.

These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

Iron is a crucial nutrient that carries oxygen to all body tissues.

During pregnancy the amount of blood in your body increases, so does your need for iron for your growing baby and the placenta. VITAFOL® contains a special iron-complex formulation that can provide all the benefits without the gastric upset often associated with other forms of iron.

Iodine supports your baby's brain development.

You may need 50% more iodine when you are pregnant.

Vitamin D is essential to support the healthy development of bones for you and your baby during pregnancy and beyond.

Supplemental Vitamin D consumed

by lactating women may contribute to levels of Vitamin D in breast milk.

DHA supports your baby's brain health, cognitive and visual development and contributes to optimal birth weight.

VITAFOL ULTRA® and VITAFOL FE+® contain algal-based DHA, not fish oil, which may reduce the risk of mercury contamination without the fishy burps!

Folic acid protects your baby's spinal cord and brain which start developing in the first month of your pregnancy.

Folic acid helps to prevent possible birth defects.

VITAFOL® contains METAFOLIN®, a special, patented form of folic acid that is easily absorbed in the body.

Take the right step with the right stuff

Your nutritional needs may be very different from another woman's. VITAFOL® provides a variety of formulations designed to meet your special needs before, during, and after pregnancy.

Ask your doctor which VITAFOL® prenatal vitamin is right for you.

VITAFOL
ULTRA

The #1 prescribed prenatal vitamin. Complete prenatal nutrition in one of the smallest capsules available.*

VITAFOL
gummies

The first and only prescription gummy available. Vitafol Gummies® have iron and almost twice as much folic acid as over-the-counter gummies.*

VITAFOL
STRIPS

Essential nutrients are in a strip that quickly disintegrates in mouth. This formulation is just right if you are suffering from morning sickness. You can still get the supplements you need without having to swallow a pill.*

VITAFOL
One

The small, all-in-one softgel capsule has key vitamins and minerals, including DHA.*

VITAFOL
Fe+

These easy-to-swallow pills provide an extra amount of iron. The unique formulation is designed to minimize stomach upset.*

VITAFOL
None

The smallest prescription prenatal supplement available that is especially beneficial in the early months of pregnancy when nausea makes it hard to swallow pills.*

Select-OB•DHA

The chewable prenatal vitamin with DHA made from natural algal oil with no fishy taste or smell. Additionally, the risk of mercury contamination may be reduced compared to fish oil.*
